Obed

13.30 – 15.40

Smart Risk Sharing

Bertrand Tardivel, FREHEL Ltd.*

Assessment of value-based contracting approaches and indication-based pricing

- New therapies pricing challenges ; what MEAs could solve
- Financial assessment of value-based approaches (MEAs and others)
- ContrAST: an application to simulate MEAs and assess their financial impact
- <https://www.contrastpharma.com/>

Managed Entry Agreements, Risk Sharing Agreements, Innovative Pricing Mechanisms, Innovative Contracting Approaches and so many other names but ultimately there is one single problem to address: how much discount this contract represents. Proper assessment of financial risk exposure can easily become intricate when you have to factor many dynamic elements: patient forecast and uptake, list price changes, treatment data and duration of treatment (clinical data, real world data...) conditional discounts (related to performance of the product or pegged to budget constraints)...

*About Bertrand Tardivel

Bertrand worked for 5 years in the pharmaceutical industry in both consulting activities and roles in pharmaceutical companies. During his career, he covered all commercial analytical functions spanning from Finance and forecasting to Pricing. Until November, Bertrand was the Head of Global Pricing at Takeda Pharmaceuticals. He left to start a new venture (Frehel) aiming at bringing to pharmaceutical companies, Healthcare professionals and Payers, the tools which will improve sustainability by understanding the mid and long terms financial consequences of decisions. ContrAST is the first application developed by Frehel. ContrAST offers a comprehensive, standardised and user-friendly approach to simulate innovative outcome-based and finance-based contracting approaches.
